

# Petition to Preserve and Restore Operation to the Boardman Dams for Electrical Energy Production

Recognizing our regions significant potential for generating clean, environmentally sound and sustainable electrical energy from our natural water resources; and due to the fact that Traverse City Light & Power indicates that we need more local generating capacity; and due to the documented health and environmental risks from toxic emissions from smoke stack based energy generation;

We, the undersigned registered voters of Grand Traverse County call upon you, our elected Commissioners, to Preserve and Restore Operation to the Boardman Dams for Electrical Energy Production.
